ABOUT ME

I am currently studying Software Engineering at Sheffield Hallam University and seeking an opportunity to gain experience from working in the industry. Throughout my years in education I have always had a passion for Computer Science and now specifically software engineering. As well as software engineering, I have always had a strong passion for sport. Balancing my sports commitment with studying for my GCSE's and A-Levels has helped me to develop excellent time-management skills to ensure I meet all my deadlines.

SOFTWARE ENGINEER SKILLS

- Designed and implemented websites using HTML5, CSS3 and JavaScript to design the front end and used MYSQL to create and manage the backend.
- Used C# to create many functional programs.
- Studied different tutorials such as Codecadamey to improve my skills and knowledge with C#.
- Created portfolios and video demonstrations to show my design and implementation of different projects.
- Worked in a team to create multiple projects and portfolios. This helped me gain team working skills such as gaining ideas from all members and delegating jobs.
- Created multiple articles of work analysing and evaluating different software methodologies and management such as different development life cycles.
- Created databases and managed them through the front-end using PHP.
- Created many different programs with different languages which are available to see on my GitHub profile.

JOBS AND EXPERIENCE

- 2023 Summer – Current: Center Parcs Nottingham- Leisure bookings advisor. This has helped me gain skills with talking to different clients and working together as a team to ensure the jobs are finished to a high standard.
- 2022 Summer – Yorkshire Wildlife Park – Warehouse Distributor. Working part of team again to ensure all the jobs were met as fast as possible.
- 2018-2021 – Feast Bawtry – Barista/Waiter/Bartender. As this was my first job, I gained valuable skills such as multi-tasking and communication within the team. I also gained skills with handling transactions and becoming resilient to any problems that may arise.
- Student Ambassador – When I was studying A-Levels I represented my college as a student ambassador and liaised with prospective students and parents.
